Hurt People Hurt People.... Bullies Are Hurting

My Mother & Dr. Parker

I bullied because my home was a dark place. I didn't need to get sent to ISS, suspended, alternative school, or expelled. I needed to be redirected. Dr. Parker did this by

- Finding my hidden potential
- Engaging me & my parent
- Alternative disciplinary option
- Representation over her reputation
- Transformation happened

Advising Generation Z-a social skills diversion mentoring program that specializes in interventions, improving behaviors, and training for young people at risk.

11 school districts

8 municipal courts

4 states

= 10,000 students

Our children weren't shielded from the pandemic

Inspect top-ranked schools with behavioral issues to enforce specialized training

- Superintendents meet with students
- Principal workshops
- Support staff training

Amplify student voices throughout the district

- Select students to share their experiences during COVID-19
- Survey students about the rules, expectations, ask if they feel valued at their campuses

AdvisingGenz Brings Innovation To Disciplinary Programs

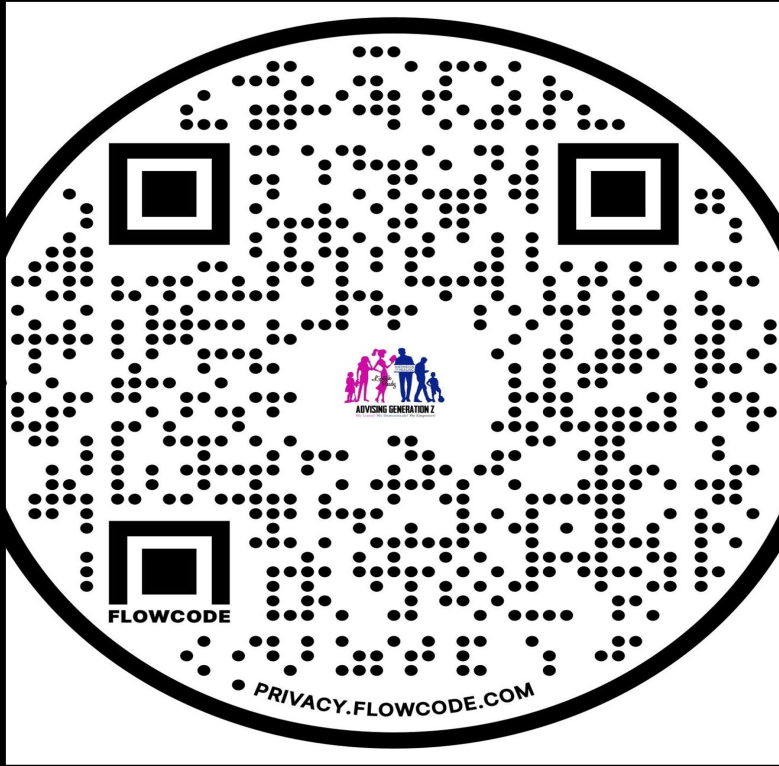

- Digital diversion & SEL for middle and high school students
- Equip teachers with content that will introduce difficult topics
- Allows students across the district to hear the same messages

We will see an increase in behavioral problems post pandemic.

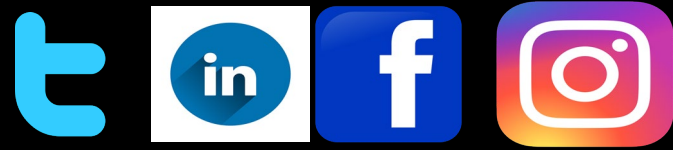

Sending students to sit quietly in a room will not solve the problem.

It's time to update our policies to match today's young people.
